9. ☐ Other _____

REASONS FOR ALLOWANCE

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Allowable Subject Matter

2. Claims 1-37 are allowed.
3. The following is an examiner's statement of reasons for allowance: none of the prior art of the record discloses or suggests a data transmission apparatus having maximum diversity gain in a mobile communication system including M transmission antennas, comprising: P encoders for receiving P information bit streams and encoding the received P information bit streams with a space-time trellis code (STTC) according to an optimal generator polynomial; M modulators for modulating P information bit streams output from the P encoders in a predetermined modulation scheme and outputting modulation symbol streams; and M puncturers connected to the M transmission antennas, for puncturing at least one modulation symbol in a predetermined position from each of the modulation symbol streams output from the M modulators, and transmitting the punctured modulation symbol streams through the M transmission antennas as recited in claims 1, 10.

Regarding claims 19, 29, none of the prior art discloses or suggests a transmission symbol stream detector for detecting transmission symbol streams transmitted from the transmitter by using a hypothetical channel output when the modulation symbol streams output from the M puncturers are transmitted through a

same channel as a channel estimated by the channel estimator, and the reception symbol streams.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
